

Scality RING & Veritas Netbackup™

One Solution to Protect It All

Let's face it; content is growing exponentially today thanks in part to the video and data requirements expected in order to serve the needs of Digital Business, Virtualization, Cloud, Big Data and IoT. Ensuring that data is always available no matter what disaster occurs requires a complete backup solution that understands your requirements for scale, integrity and speed.

Scality and Veritas Technologies have partnered to build a joint Enterprise Backup Solution that exceeds your organization's Backup and Recovery expectations by combining Veritas NetBackup's world-class, unified data protection platform with Scality's award-winning RING software defined storage solution that facilitates unlimited linear scale, 14x9's of durability and a lower TCO without being locked into proprietary hardware platforms.

What's In It for You?

Lower Costs Scality + Veritas offer worry-free expansion while reducing TCO by up to 90%. You can now leverage standard servers seamlessly (and those supply agreements!) to reduce training and maintenance costs – and for rapid scaling. Automatic rebalancing and self-healing enables efficient and cost-effective capacity expansion and server replacement for better overall lifecycle management.

Safer Data Enterprises demand data durability in the 14x9's with an intuitive management environment. This combined solution enables you to meet those demands *while* increasing data recovery times significantly from traditional systems. Extreme fault tolerance with geo-distributed deployment and configurable protection policies (replication or erasure coding) take your protection to another level.

Unified Data Protection for Physical and Virtual Environments

Scality RING is Veritas NetBackup certified and specific configurations have been configured to meet the largest and most demanding datacenter environments delivering breakthrough capabilities for virtualized systems that go well beyond what traditional backup practices can achieve.

With Veritas NetBackup you get a single, intuitive management console that reveals all backup and recovery activity, and allows consistent policies and service levels to be enforced across the enterprise.

Using Scality RING to manage the physical storage for Veritas NetBackup delivers a level of scale, performance and durability at a TCO that tape and NAS-based targets could only dream of.

Faster Recovery Unlike conventional Network Attached Storage (NAS), Scality + Veritas enables high density hard drive recovery in minutes, not days, reducing backup windows for large data sets and restore times. Complete parallelism and full scale-out file system support enables the storage throughput required to scale linearly across mixed workloads without degrading performance.

Perfect Fit A safe, fast, affordable backup solution can place huge demands on digital businesses. With the combination of Veritas and Scality, you get the same backup and recovery used in the world's largest and most complex heterogeneous environments. Mutual certification ensures you aren't chasing vendors when problems arise. Whatever the fit, we've got you covered.

About Veritas Technologies LLC

Veritas Technologies enables organizations to harness the power of their information, with information management solutions serving the world’s largest and most complex environments. Veritas works with organizations of all sizes, including 86 percent of global Fortune 500 companies, improving data availability and revealing insights to drive competitive advantage. For more information, visit www.veritas.com.

About Scality Scality, world leader in object and cloud storage, develops cost-effective Software Defined Storage (SDS): the *RING*, which serves over 500 million

end-users worldwide with over 800 billion objects in production; and the open-source S3 Server. Scality RING software deploys on any industry-standard x86 server, uniquely delivering performance, 100% availability and data durability, while integrating easily in the datacenter thanks to its native support for directory integration, traditional file applications and over 45 certified applications. Scality’s complete solutions excel at serving the specific storage needs of Global 2000 Enterprise, Media and Entertainment, Government and Cloud Provider customers while delivering up to 90% reduction in TCO versus legacy storage. A global company, Scality is headquartered in San Francisco.
